### **DETAILED ACTION**

After further search and consideration this action is issued and made non-final

#### ***Allowable Subject Matter***

1. Claims 1-7, 9-11, 15-21 and 29 allowed.
2. Claims 23-27 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### **DETAILED ACTION**

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 22 and 28 rejected under 35 U.S.C. 102(e) as being anticipated by Fried et al. (2003/0193058).

Regarding Claims 22 and 28, Fried et al. disclose an integrated circuit having fin structure where in Figs. 1, 7a/7b and in Claims 13-15, it is disclosed a method for forming buried oxide layer on a substrate (SOI), forming plurality of fin structures on the buried oxide layer, forming spacers adjacent to the fin structure and removing a portion of the spacers. Removing step is disclosed in Claim 15, where it is disclosed, “without

removing substantial portion of the spacers”, i.e. only a portion of the spacers are removed.

Regarding Claim 28, spacers are made of same material.
